Response to Amendment

* After carefully reviewing the entire application and Applicants' remarks on pages 6-7 of the response dated 6/21/07, the claims have been restricted: thus, the restriction requirement set forth below.

Election/Restriction

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Independent Claims 1, 15 and intervening claims, drawn to a method of detecting an error in a data stream, the method comprising: parsing input data packets while looking for a data packet having a predetermined format; and enabling an error-checking hardware module upon detecting an input data packet having the predetermined format.

Species II: Independent Claims 10, 14 and intervening claims, drawn to a method of checking errors in a data stream, the method comprising: checking data frames for errors;

inserting an error flag into each data frame to create a flagged data frame upon detecting an error;

storing each flagged data frame in a memory unit; and

decoding each flagged data frame by reading the data from the memory unit and processing the flagged data frame based on the error flag.

* Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

- * Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
- * Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
- * Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in the rejection under 35 U.S.C. 103(a) of other invention.
- * Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
